

**Keep your HDTV and LCD monitors crystal clear**

This advanced, low-viscosity, gel-based formula stays where you spray it, until you wipe it off. This reduces the risk of damage to your expensive equipment. Unlike household-grade solvents, the Belkin AV Display Cleaner removes dust, dirt, and grime without streaking on AV-display devices. The antistatic formula also ensures that you clean less often, because it prevents airborne pollutants from being drawn to your display.

The included scratch-free microfiber cloth gently cleans screens and lenses to the highest-possible clarity.

**Benefits**

- Alcohol-free formula safely cleans your HDTV
- Antistatic solution minimizes dust and grime
- Extra-large microfiber cloth provides scratch-free cleaning
