Digital Coaxial Audio Cable

High-Performance, 75-Ohm, Digital Coaxial Cable with Nitrogen-Injected Dielectric Material for High-Accuracy, Natural Sound Quality

Experience a cleaner, natural, more accurate sound with PureAV Audio Cables from Belkin. Using advanced engineering methods and the highest-quality materials, PureAV Cables reduce noise and interference to deliver the purest audio solution available. Ordinary audio cables, such as those that come with your audio device, sacrifice performance by using lower-grade materials, including steel or low-purity copper conductors. This can result in signal loss that causes poor high-frequency reproduction, and sound that is not truly accurate. PureAV's broad selection of products offers a full range of performance levels to enhance your home theatre experience. Specifically designed for digital devices, Digital Coaxial Audio provides better sonic accuracy and more detailed, natural sound over cables that come with your audio device.
