Composite Video & Audio to Scart Cable kit

Abrasion-resistant, flexible PVC jacket

Tinned copper-braided shield
over aluminum foil shield

Polyethylene dielectric

99.99% oxygen free
copper conductors

High-Performance, Double-Shielded Video Cable with Nitrogen-injected foamed Polyethylene Dielectric for Superior Video Performance

Experience a sharper, more vivid picture with PureAV Video Cables from Belkin. Using advanced engineering methods and the highest-quality materials, PureAV Cables isolate your signal from interference to deliver the purest video solution available. Ordinary video cables, such as those that come with your video device, sacrifice performance by using lower-grade materials, including steel or low-purity copper conductors. This results in signal loss, poor picture resolution, and inaccurate colors. PureAV's broad selection of products offers a full range of performance levels to enhance your home theater experience.

This kit provides a complete audio video connection for your DVD, VCR, receiver, computer or TV. It offers a good quality in both audio and video. RCA audio connects your equipment for better sonic accuracy and more detailed sound, and Composite Video delivers a greater level of color accuracy and sharper picture detail than standard Aerial Antenna Cable. The Scart connector enables you to connect to your TV in an optimal, single cable solution

The Purest Picture.
PureAV Audio/Video:

- improves clarity with superior-grade, 99.99%-purity copper conductors
- strengthens signal transfer using nitrogen-injected foamed polyethylene dielectric material
- creates precise contact and increased durability with corrosion-resistant, 24k gold connectors

Outstanding Signal-To-Noise Ratio.
PureAV Audio/Video:

- individually shielded signal wires
- eliminates corrosion with tinned copper-braided shielding
