This Adapter gives you a great way to record memos, lectures, interviews, or conversations. Simply connect it to your iPod and to any audio microphone with a 3.5mm plug. You can use the iPod device's abundant storage capacity to store hundreds of hours of audio, and easily review your audio notes using the built-in 3.5mm jack with headphones or your computer. You can also copy recordings to your computer for easy storage, editing, or to send in email. Belkin brings a new dimension to your iPod device—it's not just for tunes anymore.

The Adapter features an LED to help you make excellent-sounding recordings.

iPod not included  
**Manufacturer's Lifetime Warranty**

NOTE: Not compatible with iPod mini. iPod creates audio files in mono (true) WAV format. Records at the iPod rate of 16-bit audio at 8KHz.

Determine the best setting for the gain switch (located on the front of the Adapter):

- For normal voice dictation or high volume: Use low gain
- For conversation and conference: Use medium gain
- For lecture hall or low volume: Use high gain
