BELKIN® | USB Anywhere

Transfer files without using a computer

The Belkin USB Anywhere allows you to connect two USB devices and copy files from almost any USB unit and store them directly onto a portable storage device. Use the Belkin USB Anywhere:

- To transfer files without going through a computer
- As a link to copy files from a digital camera to your external hard disk
- To copy files between two MP3 players
- To transfer data between USB flash-memory drives
- To transfer files to external hard drives, CD-R burners and memory card readers
