- Installation Software CD
- User Manual
- Quick Installation Guide
- Registration Card

Specifications:

Host Interface:
32-bit PCI, compliant with PCI specification 2.1

Power Consumption:
3.3V, 350mA (max.)

Physical Dimensions:
4.75" x 4.75" x 0.78"
(120mm x 120mm x 20mm)

Weight:
2.6oz. (73.7g)

OS Support:
Windows® 98 SE, 2000, Me, or XP

Certification:
FCC Class B, CE Mark, C-Tick

802.11b 11Mbps

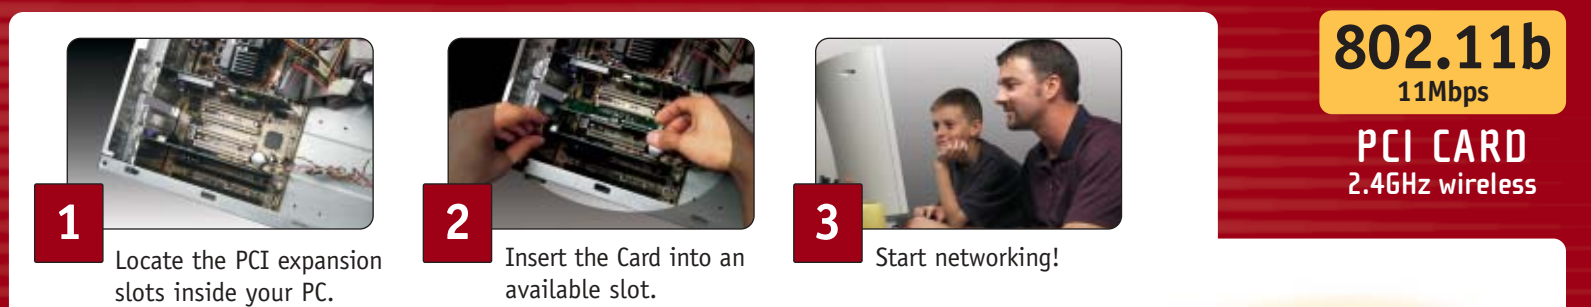

Wireless Desktop Network Card

Connect your desktop computer to a wireless network

802.11b 11Mbps

Belkin wireless networking provides the perfect solution for advanced, cable-free installations. Our full line of products lets you create wireless networks in homes and offices where installing cabling is not practical or cost-effective. The Belkin Wireless Desktop Network Card easily implements wireless networking into desktop PCs by installing into any available PCI expansion slot. The Card provides a desktop PC with wireless networking capabilities. This Plug-and-Play Card sets up easily on Windows 98 SE, 2000, Me, and XP systems. Interoperable with all 802.11b wireless devices, it uses the 802.11b wireless Ethernet standard to offer you a working range of up to 1,800 feet (550 meters) and speeds of up to 11Mbps. Now you can transfer files around the house or office—without cables—faster than a wired 10Base-T Ethernet connection.

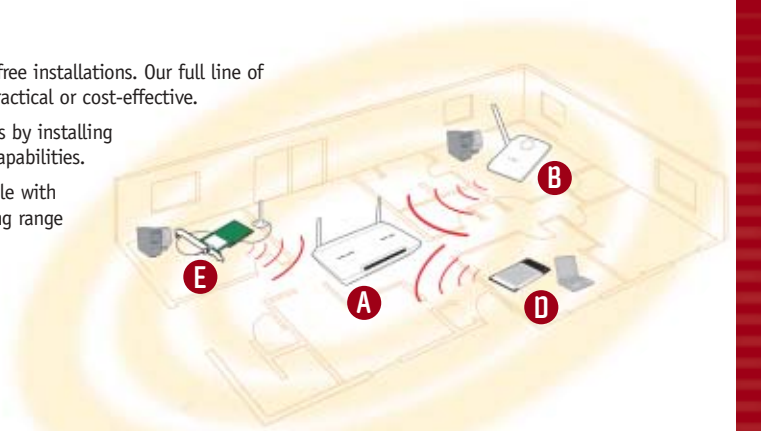

Benefits

- Adds wireless capabilities to virtually any desktop PC with a free PCI slot
- Installs with Plug-and-Play convenience
- Configures easily with wireless setup software
- Offers data and network security with 64-bit or 128-bit WEP data encryption
- Comes with a lifetime warranty and free technical support
