# BELKIN® N1 Wireless Router

## Here's what it does

Connecting the Belkin N1 Wireless Router to your cable or DSL modem lets you share your broadband Internet account with all your computers. Now you can quickly and efficiently exchange documents, share resources, and distribute large video and music files throughout your network at a link rate of up to 300Mbps.\*\*\* Our advanced security protects both your wireless and wired computers from hackers and intruders. You can add up to 16 computers to your wireless network with additional notebook and desktop adapters.

For maximum wireless performance, use the Belkin N1 Router with N1 Notebook and Desktop Cards connecting your client computers.

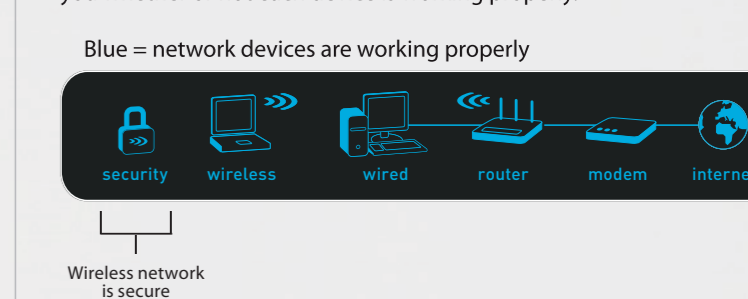

**What is N1 Wireless?**  
Based on the 802.11n draft, N1 Wireless enables multiple receivers and transmitters to send and receive data through the air, using intelligent MIMO (Multiple Input Multiple Output) spatial multiplexing techniques. This smart-antenna technology builds upon the widely deployed 802.11g standard by increasing speed, coverage, and reliability of wireless systems. Providing greater range and faster speeds, N1 Wireless offers a quick and efficient way for people to distribute video, music, photos, and files among the networked computers in their homes.

**Wireless Technology**  
Ideal for:  
N1 Streaming video, music, and photos, online gaming, and Web-surfing/email  
G+ MIMO Streaming music, online gaming, and Web-surfing/email  
G+ Streaming music and Web-surfing/email  
G Web-surfing/email

**Network Status Display**  
The Network Status Display shows the status of your network. The icons represent each component of your network and show you whether or not each device is working properly.

\*Belkin N1 Products: N1 Wireless Router (F5D8231-4), N1 Wireless Notebook Card (F5D8011), and N1 Wireless Desktop Card (F5D8001) are compliant to the IEEE 802.11n draft specification. Although Belkin incorporates all mandatory elements of the IEEE 802.11n draft specification and designs the software to be upgradeable once the standard is finalized, Belkin cannot guarantee upgradeability.

\*\*Products were tested in an outdoor environment. Actual speed and distance will vary depending on interference, network traffic, building materials, and other conditions. Range and speed is determined using a Belkin N1 Wireless Router (F5D8231-4) and an N1 Wireless Notebook Card (F5D8011) or N1 Wireless Desktop Card (F5D8001).
