24k gold-plated connectors create precise contact for low loss

Ferrite inductor blocks protect against unwanted interference

Impedance-matched construction reduces loss and increases bandwidth

Silver-plated conductors deliver best high-frequency response for optimal resolution

99.99% oxygen-free, solid-copper conductors and high-purity, silver solder joints drastically reduce signal distortion for unrivalled audio and video clarity

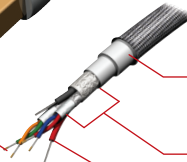

Integrated strain relief protects against wire damage for consistently high-quality audio and video

Non-slip rubber grip and integrated colour-coding provide comfort and ease of install

Abrasion-resistant, flexible PVC jacket maintains integrity, even when bent

Five-layer shielding isolates from outside noise for superior clarity

Precision-formulated, polythene dielectric material maintains stronger signals that yield superior sonic and video accuracy
