- Pentium® processor-based computer with available Hi-Speed USB 2.0 port or add USB 2.0 PCI card
- Windows® 98 SE and Me: Requires a USB 2.0 upgrade PCI card with third-party USB 2.0 drivers
- Windows 2000 and XP: Requires USB 2.0 upgrade PCI card with Microsoft® USB 2.0 drivers
- Mac® OS X: Requires USB 2.0 upgrade PCI card with third-party USB 2.0 drivers

Package Includes

- Belkin Hi-Speed USB 2.0 4-Port Hub
- Hi-Speed USB 2.0 Device Cable
- AC Power Adapter

Belkin Lifetime Product Warranty

For the life of the product, Belkin warrants that this product shall be free of defects in design, assembly, material, and workmanship (free replacement).

Installation Instructions

- 1) Plug the power adapter into a nearby AC wall outlet or surge protector. Then, plug the round power connector to the back of the Hub.
- 2) Using the enclosed cable, connect the Hub and then your computer. If your computer is on, the Hub will automatically be detected and configured. If your computer is off, turn it on for the Hub to be detected and configured.
- 3) Attach a USB 2.0 or 1.1 device to the Hub. That's all there is to it!
- 4) Keep this card for future reference.

Note: In order for the Hub to function in high-speed mode (480Mbps), it must be plugged into a Hi-Speed USB 2.0 port. High-speed hub drivers will be included with your USB 2.0 PCI upgrade card, or by your computer manufacturer.
