

BELKIN®

Wireless G All-In-One Print Server

Here's what it does

The Belkin Wireless G All-In-One Print Server lets you easily add an all-in-one printer to your wireless or wired network. It features 802.11g technology that makes sending print jobs faster than ever, and includes a memory buffer that handles your graphic jobs effortlessly.

The Print Server is so easy to install that you'll be printing in minutes. Simply connect your Print Server to your Belkin Wireless Router and run the Belkin Easy Installation CD. Next, attach your USB printer to the Print Server and load your printer drivers onto your computer. You are now free to print, scan, fax and read card media* wirelessly from around the home or office. The Print Server also works flawlessly with wired networks through its integrated Ethernet port. Compatible with most USB, network-ready printers, the Wireless G All-In-One Print Server from Belkin delivers even your most data-intensive print jobs with maximum speed and reliability.

*If your all-in-one device has a card-reader slot.

Wireless G All-In-One Print Server
