USB ADAPTER wireless

Belkin wireless networking provides the perfect solution for the most advanced, cable-free installations. Our full line of products lets you create wireless networks in homes and offices where installing cabling is not practical or cost-effective. The Belkin Wireless USB Network Adapter is so easy to install, there's not even a PC case to open. It simply plugs into an available USB port on your PC, to let you share data, printers, or high-speed Internet access over your network—instantly. This Plug-and-Play adapter sets up easily on Windows, 98, 2000, Me, and XP systems. Interoperable with all 802.11b wireless devices, it uses the 802.11b wireless Ethernet standard to offer you a working range of up to 1800 feet and speeds of up to 11Mbps. Now you can transfer files around the house or office—without cables—faster than a wired 10Base-T Ethernet connection.

- Benefits**
- Adds wireless capabilities to virtually any USB-equipped desktop or laptop
 - Installs with the Plug-and-Play convenience of USB and will have you up and running in minutes
 - Connects easily to your PC—you don't need to open your computer case
 - Transports easily with its small and compact design
 - Configures easily with wireless setup software
 - Offers data and network security with 64-bit or 128-bit WEP data encryption
 - Offers interoperability with any 802.11b-compliant wireless device
 - Comes with a lifetime warranty and free 24-hour technical support
