

3 Easy Steps
Please refer to the Quick Installation Guide for detailed instructions.

Step 1
Insert the CardBus Notebook Network Card into an available CardBus slot.

Step 2
Insert the CD in your CD-ROM drive.

Step 3
Start networking.

Wired Speeds

| Category | Gigabit Ethernet | Ethernet |
|------------------|---|-------------------------------|
| ADVANTAGE | Transfers large video, audio, and graphic files - 10 times faster than Ethernet | Transfers large files quickly |
| SPEED | 1000Mbps | 10/100Mbps |

We recommend gigabit—it's easy to install, reliable, and fast.

Here's what it does
The Belkin CardBus Notebook Network Card allows your notebook computer to connect to a 10/100Base-T Ethernet network. This connection gives your notebook computer high-speed Internet access, and lets you share files and peripheral devices with your other networked computers.

Here's what you need
The 5-Port Network Switch provides the central connection point for your 10/100 network. Position your Switch within cable length of your notebook computer and connect your cable.

For Notebook Computers
A CardBus Notebook Network Card connects a notebook computer to your Ethernet switch.

Connect your notebook computer to a wired network or broadband modem
