 - Transfer photos and home videos
 - Shop online and surf the Web
 - Email and chat
 - Expand your wireless range

BELKIN N1 Wireless Notebook Card

Here's what it does

The Belkin N1 Wireless Notebook Card connects your notebook computer to your wireless network. With a Belkin N1 Wireless Router as the central connection point of your network, your notebook can share your broadband Internet account. Powerful N1 networking lets you exchange documents, share resources, and distribute large video and music files on your network, at a link rate of up to 300Mbps. ...

For maximum wireless performance, use the Belkin N1 Router with N1 Notebook and Desktop Cards connecting your client computers.

The Belkin N1 Wireless Notebook Card also enables your notebook computer to access Internet connections known as "hotspots" in select Internet cafes and airports from a farther distance.

What is N1 Wireless?

Based on the 802.11n draft, N1 Wireless enables multiple receivers and transmitters to send and receive data through the air, using Intelligent MIMO (Multiple Input Multiple Output) spatial multiplexing techniques. This smart-antenna technology builds upon the widely deployed 802.11g standard by increasing speed, coverage, and reliability of wireless systems. Providing greater range and faster speeds, N1 Wireless offers a quick and efficient way for people to distribute video, music, photos, and files among the networked computers in their homes.

Wireless Technology
Ideal for
N1 Streaming music, photos, and Web-surfing/email
G+ Streaming music and Web-surfing/email
G Web-surfing/email

Here's what you need:

To share the Internet: Router OR Modem

To connect a desktop computer: Desktop Card OR USB Adapter

To connect a notebook computer: Notebook Card OR USB Adapter

NOTE: If you currently have a computer that is directly connected to the modem, you will not need an additional wireless card/adaptor for that computer.

Package Includes
N1 Wireless Notebook Card
Quick Installation Guide
Installation Software
User Manual

System Requirements
PC-compatible computer with one available 32-bit, CardBus slot
Windows® 2000 or XP

Specifications
Interface: 32-bit, CardBus slot
Standards: IEEE 802.11g, IEEE 802.11b, IEEE 802.11n draft

Security
WPA, WPA2-Personal
64-bit, 128-bit WEP encryption
Up to 425 meters**
Link Rate***
Up to 300Mbps in 40MHz Channel Mode
Up to 150Mbps in 20MHz Channel Mode

***NOTE: The standard transmission rate—150Mbps and 300Mbps—is the physical data rate. Actual data throughput will be lower.

3 Easy Install Steps

Please refer to the Quick Installation Guide for detailed instructions.

Step 1 Insert the CD and run installer

Step 2 Connect to wireless network

Step 3 Connect to a wireless network

Manufacturer's Lifetime Warranty
802.11g
802.11n draft
