## N Wireless Notebook Card

### Here's what it does:

The Belkin N Wireless Notebook Card connects your notebook computer to your wireless network. With a Belkin N Wireless Router as the central connection point of your network, your notebook can share your broadband Internet account. Powerful N networking lets you exchange documents, share resources, and distribute large video and music files on your network, at a link rate of up to 300Mbps.\*\*

For better wireless performance, use the Belkin N Wireless Router with N ExpressCard Adapters, Notebook Cards, and USB Adapters connecting your client computers.

The Belkin N Wireless Notebook Card also enables your notebook computer to access Internet connections known as "hotspots" in select Internet cafés and airports from a v farther distance.

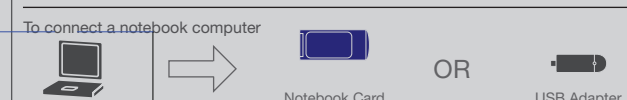

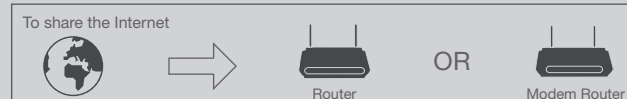

### What is N Wireless\*\*?

Based on the 802.11n draft, N wireless\* enables multiple receivers and transmitters to send and receive data through the air, using Intelligent MIMO (Multiple Input Multiple Output) spatial multiplexing techniques. This smart-antenna technology builds upon the widely deployed 802.11g standard by increasing speed, coverage, and reliability of wireless systems. Providing greater range and faster speeds, N wireless\* offers a quick and efficient way for people to distribute music, photos, and files among the networked computers in their homes.

Wireless Technology	Ideal for
N1	Streaming video, music, and photos, online gaming, and Web-surfing/email
N	Streaming music and photos, online gaming, and Web-surfing/email
G Plus MIMO	Streaming music, online gaming, and Web-surfing/email
G	Web-surfing/email

### Here's what you need:

NOTE: If you currently have a computer that is directly connected to the modem, you will not need an additional wireless card/adaptor for that computer.

## N Wireless Notebook Card

**Package Includes**  
N Wireless Notebook Card  
Quick Installation Guide  
Installation Software and User Manual on CD-ROM

**System Requirements**  
PC-compatible computer with one available 32-bit, CardBus slot  
Windows® 2000, XP or Vista™  
Minimum 64MB of RAM  
CD-ROM drive  
Internet browser

### Specifications

**Interface**  
32-bit CardBus slot  
**Network Standards**  
IEEE 802.11g  
IEEE 802.11b  
IEEE 802.11n draft\*

**Operating Range**  
Up to 365m\*\*  
**Security**  
WPA, WPA2-Personal  
64-bit, 128-bit WEP encryption  
**Link Rate\*\*\***  
Up to 300Mbps in 40MHz Channel Mode

\*\*\*NOTE: The standard transmission rate—300Mbps—is the physical data rate. Actual data throughput will be lower.

## N Wireless Notebook Card

## ENHANCED SPEED & COVERAGE

- Wirelessly connects to your high-speed Internet from anywhere within your wireless range
- Allows you to stream music, share photos, shop and surf on the Web, and make multiple VoIP phone calls

## N Wireless Notebook Card

### 3 Easy Install Steps

Please refer to the Quick Installation Guide for detailed instructions

**Step 1**  
Insert the CD and run installer

**Step 2**  
Insert Card into notebook

**Step 3**  
Connect to a wireless network

**Manufacturer's Lifetime Warranty**

Compatible with:  
802.11b  
802.11g  
802.11n draft\*
