

Desktop Network PCI Card

The Belkin Desktop Network PCI Card for PC computers is the best solution for connecting your desktop PC to a cable or DSL Internet modem. It is also useful when creating a 10/100 BaseT Ethernet network.

The Belkin Desktop Network PCI Card for PC computers is the best solution for connecting your 32-bit PCI local bus desktop computer to a broadband Internet modem or building a 10/100 Base-T Ethernet network. The Network PCI Card is compliant with Ethernet 802.3 and 802.3u standards. Easy to install, the card plugs into any available PCI expansion slot and lets you connect your PC to a cable or DSL modem, as well as share files and peripherals with computers that are connected to the network. An added Wake on LAN feature keeps resources available to the network, even when the computers are in sleep mode.

Benefits

- Compliant with Ethernet IEEE 802.3 and 802.3u standards
- Installs easily into any 32-bit PCI local bus computer
- Access files and peripherals on computers that have gone into sleep mode with Wake On LAN feature
- Lifetime Warranty and Free Technical Support
- Share your Internet connection- perfect for multiplayer gaming, accessing streaming audio and video, and other high-end Internet functions
- Exchange data quickly between connected PCs and notebooks, share printers and other peripherals, and communicate via e-mail
- Auto-detection feature offers future scalability of 10Base-T networks into 100Base-T Networks
- Monitor network traffic and troubleshooting with LED indicators
- Plug and Play compatible
- Supports Win3.1, WFW 3.11, 95, 98, Me, NT, 2000, XP, FreeBSD, Linux, DOS, OS/2 Netware, SCO UNIX, Packet

● System Requirements

PC-compatible computer with available PCI slots
