

24-Port 10/100 Switch

The Belkin 24Port 10/100 Switch simply plugs in for instant high performance and provides your servers and workstations the capacity to transfer large files throughout your network quickly and reliably.

The Belkin 24-Port 10/100 Switch enables your existing 10/100 network to run at Fast Ethernet networking speeds. Our Switch simply plugs in for instant high performance and provides your servers and workstations the capacity to transfer files throughout your network.

Designed to provide an efficient, reliable, and fast backbone for a small-to-medium-sized company, the 10/100 Switch is easy to install. Its compact case mounts conveniently on your wall or desktop, and rack-mount hardware is included for optional placement in a 19-inch rack. A metal chassis houses the internal power supply to ensure a durable form factor. All ports automatically adjust for straight-through or crossover cables—you don't have to worry about cable type.

Compatible with existing 10/100 networks and major operating systems, your 24-Port 10/100 Switch from Belkin delivers error-free transfers at maximum network speeds.
