

Powerline Turbo Networking Adapter (85 Mbps)

Connect computers to a network using electrical outlets.

Belkin's Powerline Networking Adapters utilize existing electrical wiring to connect all computers to form a network. Simply plug one end of the Adapter into an available wall outlet and plug the other end into any RJ45 (Ethernet) port using the included cables.

Benefits

- Provides a secure, stable network signal
- Plug-and-play setup
- Wide coverage, ideal for creating Internet connectivity in remote rooms or places that are hard to reach with wireless connections
- Transfers data at up to 85 Mbps
- Ideal for high-quality transmission of video and other data

System Requirements

- Computer with an Ethernet connection
- Available power outlet
- Standard home powerline wiring

Package Includes

- 2 F5D4071 Powerline Networking Adapters
- 2 RJ45 Ethernet Cables
- 2 Wall-Plug Adapters
- 2 Power Cords
- Quick Installation Guide
- CD with Installation Software and User Manual
