

## Desktop Network PCI Card - F5D5000ed

The Belkin Desktop Network PCI Card for PC computers is the best solution for connecting your 32-bit PCI local bus desktop computer to a broadband Internet modem or building a 10/100 Base-T Ethernet network. The Network PCI Card is compliant with Ethernet 802.3 and 802.3u standards. Easy to install, the card plugs into any available PCI expansion slot and lets you connect your PC to a cable or DSL modem, as well as share files and peripherals with computers that are connected to the network. An added Wake on LAN feature keeps resources available to the network, even when the computers are in sleep mode.

### Product Features:

- Compliant with Ethernet IEEE 802.3 and 802.3u standards
- Installs easily into any 32-bit PCI local bus computer
- Access files and peripherals on computers that have gone into sleep mode with Wake On LAN feature
