

Internal SCSI Adapter - F2N1027b

When John Atanasoff constructed the first semi-electronic digital computing device in 1939 he never could have imagined that over sixty years later, Belkin components would carry every SCSI cable imaginable. The Micro DB68 Female to a 50 Socket (female) IDC Pro Series SCSI internal adapter with active termination converts a Micro DB68 male connector to a 50 Socket IDC connector. Used to interface a SCSI III device with a SCSI ribbon cable.
