

OmniView Quad-Bus 16-Port KVM Expander

Designed for use with your OmniView Quad-Bus Series KVM Switch, the Expander offers an affordable way to add ports to your configuration. Using the Expander rather than adding KVM Switches provides you with a cost savings of approximately 30 percent%. The Expander connects to the Quad-Bus Series KVM Switch and instantly takes on the features of the Switch, including cross-platform support and flash upgradeability. Expanding your configuration through dedicated daisy-chain ports offers scalability without losing a server port. You can add up to 15 Expanders to your Quad-Bus Series Series KVM Switch, for control of up to 256 servers.

Benefits

- Adds 16-ports to the ENTERPRISE Quad-Bus Series KVM Switch
- Allows daisy-chaining of up to 15 Expanders for control of up to 256 servers
- Supports all features of the ENTERPRISE Quad-Bus Series KVM Switch
- Update your KVM Firmware http://autoupdate.belkin.com
