

## Blue Series S-Video Cable

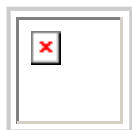

S-Video cables use advanced engineering methods and the highest quality materials to isolate your signal from interference to deliver the purist video signal available. Ordinary video cables, such as those that come with your video devices, sacrifice performance by using lower grade materials, including steel or low-purity copper conductors. This can result in signal loss, poor picture resolution and inaccurate colours.

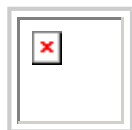

### Options Available

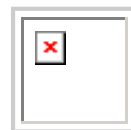

AV21100qp03

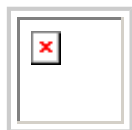

AV21100qp06

AV21100qp12

AV21100qp30

AV21100qp50

### Benefits

- Connect a DVD, VCR or satellite video source to your TV.
- Improves clarity with superior-grade, 99.99%-purity copper conductors.
- Maintains signal integrity and 75-Ohm impedance using precision-formulated, polyethylene dielectric material.
- Isolates noise with 100%-coverage aluminium/Myler foil shield.
- Creates precise contact and increased durability with corrosion-resistant, 24K gold connectors.
- Delivers maximum bandwidth with 75-Ohm coaxial construction.
- Provides maximum isolation from electromagnetic and radio frequency interference with double shielded construction.
- Creates a second layer of protection with tinned, copper-braided shielding
- Available in the following lengths: 0.9m, 1.8m and 3.7m
