

16-Gauge Speaker Cable with Pins

High-Performance 16 Gauge Speaker Cable with Precision-Formulated Polyethylene Dielectric Material for High-Accuracy and Natural Sound Quality.

Using advanced engineering methods and the highest-quality materials, PureAV Speaker Cables deliver the purest audio solution available. Ordinary speaker cables sacrifice performance by using lower-grade materials, including steel or low-purity copper conductors. This can result in signal loss that causes poor high-frequency reproduction, and sound that is not truly accurate. PureAV's speaker cables use polyethylene dielectrics to maintain signal strength over longer distances.

Sixteen-gauge speaker cables improve power transfer over 18-gauge, resulting in natural, more accurate sound. They offer a larger construction and more copper than 18-gauge, which is the recommended minimum gauge for smooth sound reproduction. The longer the cable length and the larger the amp, the heavier the gauge required.

Options Available

AV23001qp100

AV23001qp25

Benefits

- Delivers better audio clarity and a more natural sounding midrange with superior-grade, 99.99%-purity copper conductors
- Generates better high frequencies and a more realistic stereo image using precision-formulated polyethylene dielectric material
- Creates precise contact and increased durability with 4 corrosion-resistant, 24k gold speaker pins

Product Code

AV23001qp

Product Name

16-Gauge Speaker Cable with Pins
