

Subwoofer Audio Cable

Subwoofer Audio Cables are designed specifically for the very low-bass frequencies produced by subwoofers. They use a single RCA jack for audio input and/or output.

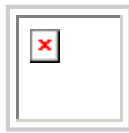

PureAV Silver Series Subwoofer Audio Cables use superior-grade materials and advanced technologies to deliver fuller, deeper, more extended bass response.

Benefits

- Drastically reduces signal distortion for unrivaled audio clarity using 99.9997% oxygen-free, PCOCC conductors and high-purity, silver solder joints
- Optimizes performance at all frequencies for consistent, exact sound reproduction using hybrid-conductor technology
- Maintains stronger signals that yield superior sonic accuracy with precision-formulated, polyethylene dielectric material
- Isolates from outside noise for superior clarity through double-shielded construction and individually insulated mid-bass/upper-bass conductors
- Protects against wire damage for consistently high-quality audio with integrated strain relief
- Maintains integrity, even when bent with abrasion-resistant, flexible PVC jacket
- Creates precise contact for low loss with split-tip, center-pin, and 8-cut, 24k gold-plated connectors
- Provides comfort and ease of install with non-slip rubber grip and integrated color-coding
