

Digital Optical Audio Cable

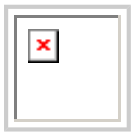

Silver Series Digital Optical Audio Cables provide an ideal solution for connecting DVD Players, CD Players, AV Receivers, and Digital Satellite Receivers for Dolby® Digital and DTS surround sound. The multi-core fiber construction reduces digital distortion for a marked improvement over the sound quality of single-core cables.

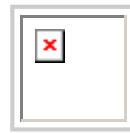

Options Available

AV50000qp16

Benefits

- Drastically reduces jitter/signal distortion for exceptional sonic accuracy using premium-quality, multi-core optical fiber
- Offers maximum durability and lowest possible loss for a more detailed, natural sound with high -performance cladding
- Creates stronger signals and better high frequencies for the cleanest audio possible using precision-polished, optical terminations
- Protects against wire damage for consistently high-quality audio with integrated strain relief and abrasion-resistant, flexible PVC jacket
- Provides comfort and ease of install with non-slip rubber grip and integrated color-coding

Product Code

AV50000qp
