

Component Video Cable

Component Video Cables provide more color detail than S-Video and are an ideal solution for HDTV, Digital Satellite, and progressive scan DVD players.

PureAV Silver Series Component Video Cables deliver a more vivid and vibrant picture and true 75-Ohm impedance for the ultimate home theater experience. The use of sophisticated technology and superior-quality materials enable brighter, more saturated colors and sharper images.

Benefits

- Distributes a consistent, accurate picture by providing maximum bandwidth through true 75-Ohm impedance
- Drastically reduces signal distortion for unrivaled image clarity using 99.9997% oxygen-free, PCOCC conductors and high-purity, silver solder joints
- Drastically reduces signal distortion for unrivaled image clarity using 99.9997% oxygen-free, PCOCC conductors and high-purity, silver solder joints
- Delivers best high-frequency response for optimal resolution using silver-plated conductors
- Isolates from outside noise for superior clarity with quad-shielding
- Maintains stronger signals that yield superior color accuracy and clarity with precision-formulated, nitrogen-injected dielectric material
- Protects against wire damage for consistently high-quality audio with integrated strain relief
- Maintains integrity, even when bent with abrasion-resistant, flexible PVC jacket
- Creates precise contact for low loss with split-tip, center-pin, and 8-cut, 24k gold-plated connectors
- Provides comfort and ease of install with non-slip rubber grip and integrated color-coding
