

S-Video Cable

S-Video Cables provide better color and detail than Composite Video and are typically used with DVD players, S-VHS VCRs, and Digital Satellite Receivers.

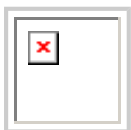

PureAV Silver Series S-Video Cables deliver true 75-Ohm impedance and utilize premium-quality materials to deliver excellent clarity and superior color accuracy.

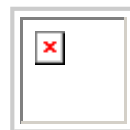

Options Available

AV51100qp04

AV51100qp08

AV51100qp16

Benefits

- Distributes a consistent, accurate picture by providing maximum bandwidth through true 75-Ohm impedance
- Drastically reduces signal distortion for unrivaled image purity using 99.9997% oxygen-free, PCOCC conductors and high-purity, silver solder joints
- Delivers best high-frequency response for optimal resolution using silver-plated conductors
- Isolates from outside noise for superior clarity with quad-shielding
- Maintains stronger signals that yield superior color accuracy and clarity with precision-formulated, polyethylene dielectric material
- Protects against wire damage for consistently high-quality audio with integrated strain relief
- Maintains integrity, even when bent with abrasion-resistant, flexible PVC jacket
- Creates precise contact for low loss with 24k gold-plated connectors
- Provides comfort and ease of install with non-slip rubber grip and integrated color-coding
