

USB/FireWire 7-Port Hub for Mac® mini - FSU507uk

Our newest Hub has a low-profile design specifically engineered to stack on top of or below the Mac mini-helping to organize and save your valuable desktop space. The Hub provides four downstream USB ports compatible with both Hi-Speed USB 2.0 and USB 1.1 (low- and full-speed) devices. It also features two FireWire ports to connect up to two of your FireWire devices. A single USB and a FireWire port are located on the front of the Hub to give you easy access for quick, temporary connections of USB thumb drives, media readers, small accessories such as the Apple® iPod and iPod shuffle, and more.

Product Features:

- Provides a low-profile, space-saving platform for stacking your Mac mini
- Features USB and FireWire® front-loading ports for easy access
- Combines FireWire and USB technologies in one easy installation
- Connects up to 4 high-speed, low-speed, or full-speed USB devices
- Adds 3 FireWire ports to your Mac mini
- Includes a Belkin Lifetime Warranty
- Compliance: USB-IF, OHCI-compliant, FCC/CE/C-Tick-compliant
