

Ultra ATA Hard Drive Round Cable, single/dual drive, Glow-In-The-Dark, 24 inches - F2N1123ea02-GLO

Belkin Ultra ATA Hard Drive and Floppy Round Cables dramatically enhance airflow within the CPU over flat-ribbon style cables. They offer ideal support for high-end, heat-generating applications such as gaming, full-motion video, and multimedia by reducing your PC's internal temperature, averting potential damage to your system's performance and lifespan. These Cables glow in the dark under a black light-or after charging next to a light source-to create custom light effects inside your PC.

Featuring a clear jacket with silver braid shielding, these Cables are easy to bend and install, and they feature quick-pull tags that make them simple to identify. The Ultra ATA Hard Drive Round Cable features 40 data wires plus 40 ground wires to provide the highest performance possible for your CD-R/RW, and 66/100/133 drives, and other ATA devices. Our Floppy Round Cables come in single- and dual-drive forms for your 3.5-inch floppy drive and other 34-socket devices.

Características del producto:

- Reduces clutter and overheating within the CPU
- Glows in the dark to create custom light effects inside your PC
