

CardBus Network Card - F5D5010

The Belkin CardBus Network Card is the superior solution for connecting your notebook or laptop PC to a broadband Internet modem or building a 10/100 Base-T Ethernet network. The network card is compliant with Ethernet IEEE 802.3 and 802.3u standards. Easy to install, the card plugs into any available Type II 32-bit CardBus slot and lets you connect your PC to cable or DSL modem, as well as share files and peripherals with computers that are connected to the network. An added Wake on LAN feature keeps resources available to the network, even when the computers are in sleep mode.

Características del producto:

- Compliant with Ethernet IEEE 802.3 and 802.3u standards
- Installs easily into any Type II 32-bit CardBus slot
- Access files and peripherals on computers that have gone into sleep mode with Wake On LAN
