

Pro Series External SCSI II (Fast SCSI) Cable - 1.8m(6 feet) - F2N968b06

When John Atanasoff constructed the first semi-electronic digital computing device in 1939 he never could have imagined that over sixty years later, Belkin components would carry every SCSI cable imaginable. The Micro DB50 Male to Micro DB50 Male Pro Series SCSI II (fast SCSI) Cable is used to interface any two SCSI I/II devices, such as scanners, CD-ROM drives and more, with Micro DB50 female ports.

Características del producto:

- Rated for SCSI II applications.
- Double shielded (braid and foil) to meet SCSI specifications and ensure compliance with FCC requirements reducing EMI/RFI interference.
- Low-capacitance impedance matched 28 AWG stranded tinned copper are individually insulated in polypropylene.
- The Belkin Lifetime Warranty.
- 25 or 34 tightly woven conductor pairs ensures that each data line is paired with a ground line to minimize interference, ensuring error-free data transmissions.
- State-of-the-art wiring design ensures 100% compatibility.
- Gold plated copper contacts for a clean, clear transmission.
- PVC premold encapsulates individual conductors to eliminate stress.
- Flexitec® #153: PVC rubberized cable jacket is extremely flexible for use in tight areas.
- Aluminum undermold shield helps meet FCC requirements.
- Ground indents provide excellent conductivity and retention with mating connector.
- Without Retail Packaging
