

## Pro Series External SCSI I Centronics 50 Male to Centronics 50 Male-10M(32feet) - F2N956b10

When John Atanasoff constructed the first semi-electronic digital computing device in 1939 he never could have imagined that over sixty years later, Belkin components would carry every SCSI cable imaginable. The Centronics 50 Male to Centronics 50 Male Pro Series SCSI I Cable is used to connect a SCSI I device, like a scanner, to a PC when both devices have Centronics 50 female ports.
