

Pro Series Extension Cable Straight-Through, 25-Conductor - 3Metre (10 feet) - F3D112-10-GLD

They're never long enough. It almost makes it to my computer, but an inch in front of the plug I run out of cable. That's why I'm glad Belkin makes an extension cable to keep life simple.

The Extension Cable Straight-through, 25 Conductor is most commonly used to extend the length of an existing DB25 cable assembly, but it can also be used as a PC to serial modem cable.

Características del producto:

- State-of-the-art wiring design ensures 100% compatibility with all devices 100% of the time.
- Gold plated copper contacts provide maximum conductivity and keep data loss to a minimum.
- Oversized ergonomic thumbscrews make installation a breeze.
- The Belkin Lifetime Warranty.
- Flextec® PVC rubberized cable jacket is extremely flexible for use in tight areas.
- Molded strain relief and PVC overmolding to ensure a lifetime of error-free data transmission.
- 28 AWG stranded tinned copper conductors are individually insulated in polypropylene to minimize cross talk, ensuring high-speed, error-free transmission.
- Ground indents provide excellent conductivity and retention with mating conductors.
- PVC premold encapsulates individual conductors to ensure electrical isolation and relieve stress.
- Aluminum undermold shielding helps to meet FCC requirements on EMI/RFI interference.
