

## Wireless Pre-N Notebook Network Card - F5D8010

El sustituto de este producto es el artículo n° F5D9010ef

The Belkin Wireless Pre-N Notebook Network Card connects your notebook computer to your wireless network with new Belkin Pre-N technology. It lets you share your broadband Internet connection farther and faster than ever. Featuring smart antenna technology, the Pre-N design helps combat distortion and interference so the Network Card can send its data streams greater distances, more reliably.

With a Belkin Wireless Pre-N Router as the central connection point of your network, your computers can share your high-speed Internet account as well as files, printers, and hard drives. While on the road, you can use the Belkin Wireless Pre-N Notebook Network Card to connect to any of the increasingly available public wireless hotspots found in airports, coffee shops and hotels. (For these connections, you do not need a wireless router).

Belkin's Pre-N technology offers backward compatibility with existing 802.11g and 802.11b products, to provide seamless integration into existing wireless networks. In fact, its advanced technology enables Belkin Pre-N products to significantly improve the performance of standard 802.11g and 802.11b devices in the mixed network environment.

### Características del producto:

- 8x greater coverage than standard 802.11g - Belkin Pre-N provides the industry's best wireless coverage, extending your range with improved reliability and fewer drops.
- 6x greater speeds than standard 802.11g - Belkin Pre-N provides the industry's fastest wireless connection for gaming, streaming video, Voice over IP, and moving large files efficiently and quickly between all the devices in your networked home.
- Improved performance of standard 802.11g and 802.11b networking devices - Using a Belkin Pre-N Router or Card with an older 802.11g or 802.11b networking product increases wireless coverage up to 20%.
- Improved resistance to wireless interference - Belkin Pre-N products sense potential interference and dynamically shift to the clearest wireless channel available.
- Belkin Pre-N products do not drop to the lowest networking speed in a mixed-mode environment - If a standard 802.11g or 802.11b device is introduced into a Belkin Pre-N network.
- The Belkin Pre-N product will not drop to the standard 802.11g or 802.11b speeds - Belkin Pre-N products will continue to transmit at a link rate of 108Mbps, a result competing products cannot achieve.
- Advanced Security - Wi-Fi®reg; Protected Access (WPA) support provides enhanced encryption protecting your wireless network.
- Pop-up Blocker - 6 months of free pop-up, adware, and spyware stopper
- Supported Operating Systems - Microsoft Windows 2000 / Microsoft Windows XP
