

## ExpandView CAT5 8-Port Broadcast Module

The Belkin ExpandView CAT5 Broadcast module (broadcast module) duplicates your high-resolution video output, boosting its signal over UTP cabling from one video port to multiple displays. A great solution for trade shows, In-store advertising, bulletins boards and training environments. The ExpandView CAT5 can place the digital signage displays up to 110m/360ft away from the source and can distribute the signal on up to 512 displays. By transmitting a video signal from the computer or player to the appropriate displays, the ExpandView CAT5 is the key contributor to the actual digital signage performance. The video distribution product you choose is a significant part of the project budget. That's why choosing for the ExpandView CAT5 is vital in ensuring a successful and affordable digital signage installation. Typical applications for the ExpandView CAT5:

Marketing: Tradeshow displays, advertising networks and corporate identity branding.  
Interactive messaging: In-store advertising and great for pubs, clubs, restaurants and leisure complexes.  
Corporate Communications: Branch office messaging and employee training.  
Community: Campus bulletin boards, community bulletin boards and franchise communication systems.
