

PureAV™ Silver Series Scart Audio/Video Cable

Standard oxygen-free copper (OFC) contains hundreds of individual copper crystals per inch, which can negatively effect signals as they pass from one crystal to another. PureAV's PCOCC process creates a single copper crystal with exceptional transmission properties. Scart cable offers an optimal solution for analogue audio and video transfer.

Benefits

- 24k gold-plated connectors create precise contact for low loss
- Precision-formulated, polyethylene dielectric material maintains stronger signals that yield superior colour accuracy and clarity
- 99.9997% oxygen-free, PCOCC conductors and high-purity, silver solder joints drastically reduce signal distortion for unrivalled image and audio clarity
- Silver-plated conductors deliver best high frequency response for optimal resolution
- Integrated strain relief protects against wire damage for consistently high-quality audio and video
- Non-slip rubber grip provides comfort and ease of install
- Abrasion-resistant, flexible PVC jacket maintains integrity, even when bent
- Quad shielding isolates from outside noise for superior clarity using 2 100%-coverage aluminium/ Mylar foil shields and 2 high-coverage, tinned, copper-braided and spiral shields

Product Code

AV51500ea04

Product Name

PureAV™ Silver Series Scart Audio/Video Cable
