

## Optical Mouse USB and PS/2 with Scroll Wheel - White - F8E814qeaOPT

The Belkin Optical Mouse offers fluid, optical motion when you navigate documents and the Web. It frees you from the inaccuracies and required maintenance of conventional mice that use a rubber-ball mechanism. This innovative device uses a digital, optical sensor that photographs surface motion at 1,500 frames per second.

### Product Features:

- Navigate with Plug-and-Play, optical precision
