

## USB 2.0 and FireWire ExpressCard™ - F5U506ea

Why ExpressCard? ExpressCard, the new standard destined to replace CardBus, effectively quadruples the amount of available computing bandwidth. This results in faster music downloads, smoother streaming video, and lightning-fast access to mass-storage devices.

The Belkin USB 2.0 and FireWire ExpressCard offers the perfect solution for users who want to add fast FireWire and Hi-Speed USB 2.0 ports to their notebook computer. The ExpressCard takes advantage of the additional bandwidth and features provided by the new ExpressCard I/O interconnection standard. Now you can stream movies and download video from your camcorder to your hard drive simultaneously-without worrying that your computer will freeze, crash, or slow down to a trickle. ExpressCard future-proofs your notebook computer with technology so advanced that it exceeds the processing-speed capability of many devices currently on the market. Installing the ExpressCard now will give you device-upgrade expansion room for many years to come.

### Product Features:

---

- Connects 1 USB 2.0 and 2 FireWire devices to your notebook computer
- Installs easily into any 34mm or 54mm ExpressCard bus\* slot
- Future-proofs your notebook computer for tomorrow's bandwidth-intensive applications
- \*Note: Enclosed ExpressCard will not fit into a standard PCMCIA or CardBus slot
