

DVI Flat Panel A/V Cable

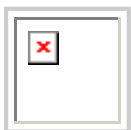

Digital Visual Interface (DVI) Dual-Link provides the brightest, most accurate colours and sharpest detail by transferring data in pure digital form to deliver true high-definition, all-digital video. To obtain the highest possible resolution from DVI technology, a dual-link, 24-pin connection is required. Dual-link provides the convenience of backward-compatibility with AV hardware that is single-link-enabled only.

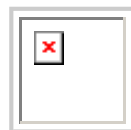

Options Available

AV51400qp04

AV51400qp08

AV51400qp16

Benefits

- Integrated strain relief, protects against wire damage for consistently high-quality video
- Non-slip rubber grip and integrated colour coding, provide comfort and ease of install
- 24k gold-plated connectors create precise contact for low loss
- Ferrite inductor block, protects against unwanted interference
- Impedance-matched construction, reduces loss and increases bandwidth
- 99.99% oxygen-free, solid-copper conductors and high-purity, silver solder joints, drastically reduce signal distortion for unrivalled video clarity
- Abrasion-resistant, flexible PVC jacket, maintains integrity, even when bent
- Five-layer shielding, isolates from outside noise for superior clarity
- Precision-formulated polyethylene dielectric material, maintains stronger signals that yield superior sonic and video accuracy
- Silver-plated conductors, deliver best high-frequency response for optimal resolution
- Belkin Lifetime Warranty
