

## OmniView™ SMB Remote IP Device - F1DP101Mea

The OmniView SMB Remote IP Device provides an easy way to add remote access to your existing KVM and server configurations. When connected to a KVM, the device allows you to access and control your servers from anywhere, at anytime - using a Web browser. This round-the-clock remote access lets you troubleshoot servers faster and more efficiently, dramatically reducing server downtime and service costs. The Remote IP Device provides secure, out-of-band, BIOS-level access and works with any KVM switch, or may be connected to a single computer.

### Product Features:

- Adds one remote user to any KVM switch
- BIOS-level access to servers using a standard Web browser
- Out-of-band management
- Secure, 128-bit SSL encryption over a TCP/IP connection
- Supports serial devices such as PDUs, to perform hard reboots remotely
- Allows up to 8 users to view digital video for collaborative troubleshooting
- Prevents unauthorized access with multi-user password protection
- Requires no software or licensing fees
- Positions on desktop or mounts to back of rack for 0U installation
- Flash upgradeable for consistent compatibility
- Works with any KVM or computer with PS/2 or USB connection
