

## N Wireless Notebook Card

The N Wireless Notebook Card connects your notebook computer to a wireless network. Providing greater range and faster speeds, N offers an excellent solution for sending large files such as video, music, photos, and documents among the networked computers in your home.

Based on the 802.11n draft, N Wireless enables multiple receivers and transmitters to send and receive data using Intelligent MIMO (Multiple Input Multiple Output) spatial multiplexing techniques which greatly increases speed, coverage, and the reliability of the wireless network.
