

FlyWire™ - AV69003uk

FlyWire lets you place your HDTV anywhere. It allows you to wirelessly connect to, and switch among, several video-source devices: high-definition or standard-definition, digital or analog. It supports the most advanced high-definition standards, including 1080p/24, for today's high-end 120Hz TVs.

This innovative wireless HD interface from Belkin lets you connect your complete line of high-definition and standard-definition components, such as Blu-ray® players, digital video recorders (DVRs), HD set-top boxes, Wii, PS3™ or Xbox® video-game consoles, or standard DVD players/recorders.

With a range capable of reaching your entire home, FlyWire enables you to relocate or hide your components and mount your flat-panel HDTV anywhere, on any wall or surface, inside or outside of your house. You can enjoy HD programming from your HD set-top box, play the most intense video games with no latency, and watch HD movies at 1080p for a True Cinema experience.

2 Year Warranty
