

OmniView® Secure DVI-D Dual-Link 4-Port KVM Switch - F1DN104Dea

Designed specifically for secure military and government installations, the OmniView Secure KVM Switch lets you control multiple DVI-D computers from a single DVI-D console. This product ensures the integrity of your data by safely switching among secure and unsecured computers. The Switch features a dedicated processor per computer port to keep each computer separate and secure at all times, and prevent data transfer among them. The OmniView Secure KVM Switch is pending on NIAP's certification for Common Criteria validation, EAL 4+.

Product Features:

- NIAP Common Criteria validation, EAL 4+ certification pending
- Supports DVI-D Dual-Link resolution of up to 2560x1600
- Prevents data transfer between secure and unsecured computers
- Non-reprogrammable firmware prevents tampering with KVM logic
- Provides full support for USB computers, keyboards, and mice
- Rugged, metal enclosure provides stability and allows Switch to be placed beneath monitor or other desk item
- Compact design allows for desktop or 1U rack-mountable installation
- Dedicated port selectors allow you to switch easily from one computer to the next
- LED indicators provide easy identification of which computer is being accessed
- Made in the USA of imported parts
- Features no hot keys or OSD to prevent data from being stored on KVM Switch
