

The Belkin ExpandView CAT5 duplicates your high-resolution video output, boosting its signal over CAT5 cabling from one video port to multiple displays. A great solution for trade shows, In-store advertising, bulletins boards and training environments. The ExpandView CAT5 can place the digital signage displays up to 110m/360ft away from the source and can distribute the signal on up to 512 displays.

Features:

- Distributes one videosignal over 110m on up to 512 displays
- Perfect for both digital sinage and CBT environments
- Supports high video resolutions of up to 1600x1200@75Hz
- OS independent
- Inexpensive CAT5 cabling required
- Easily scalable up to 512 displays
- 3-Year Manufacturer's Warranty and Free Technical Support.
