Protegge da picchi di corrente e cortocircuiti

The Auto Power Cord connects your iPod to your car's power source and provides unlimited play and standby time. You'll know your Auto Power Cord is properly connected by its illuminated LED indicator. The unit is engineered with a replaceable safety fuse to protect from potentially damaging spikes or short circuits. When used with the Belkin TuneCast II (F8V3080-APL), you can power your TuneCast II while on the road and preserve battery life.

Turn off your iPod. Connect the Auto Power Cord to your iPod and the cigarette lighter. The light on the Power Cord will indicate proper functioning.

We recommend that you operate the Power Cord with the vehicle's engine running.

*iPod and TuneDok not included*
