Current

3,250 watts

Technical Specifications

Continuous Duty Electrical Rating: 250V/13A/50Hz/3,250W

Maximum Energy Dissipation: 1,940 Joules
L-N: 540 J • L-E: 540 J • N-E: 540 J
Telephone Line: 320 J
Joule is a measurement of energy a surge protector component can absorb. A higher joule rating reflects higher-quality surge protection and longer product life.

Maximum Spike Current: 45,000 Amps
L-N: 15,000 A • L-E: 15,000 A • N-E: 15,000 A
Maximum spike current is measured by amperage. Higher amperage rating reflects greater absorption capacity against lightning or sudden dramatic power spikes.

Maximum Spike Voltage: 6,000 Volts

Response Time: <1 Nanosecond
A rating of <1 nanosecond (a billionth of a second) instantly responds to prevent disturbances before harming equipment.

EMI/RFI Noise Filtration: 150kHz-100MHz up to 58 dB Reduction
Electromagnetic interference/radio frequency interference causes AC line contamination that leads to computer lockups, audio/video interference and data loss. The greater the decibel reduction across a wider frequency range, the greater the clean protection.

Over 50 million Belkin SurgeMaster® sold worldwide!

Power surges and lightning strikes are not the only things that can damage your home electronic equipment. Simply switching appliances on and off can create electrical imbalances that cause cumulative, permanent damage to your computers, peripherals and electronic equipment. Our decades of research and power protection development have led us to the release of this breakthrough SurgeMaster series. Using advanced design elements and top-quality construction as well as superior circuitry, the SurgeMaster offers the most complete protection from power surges, AC contamination and spikes available. As the leading developer of surge protection solutions, Belkin engineers and rigorously tests all its products to ensure your equipment will be safe from harmful electrical imbalances, whatever your configuration and whichever grade you choose. The Belkin SurgeMaster is your premiere solution for clean, safe power and the industry's best in construction, ratings and safety standards. Over 50 million Belkin SurgeMaster units are protecting consumer electronics worldwide!

Use the following colour-coded chart as a guideline in choosing your level of protection.

Telephone, Aerial and Coaxial Cable Line Protection	Superior Series	Maximum Series	Gold Series
To protect devices that use telephone, aerial or coaxial cable lines against electrical surges and spikes, a Belkin SurgeMaster® with telephone, aerial and/or coaxial cable line protection must be used.	<ul style="list-style-type: none"> Up to 45,000 Amps Up to 1,940 Joules Up to € 100,000 Connected Equipment Warranties 	<ul style="list-style-type: none"> Up to 75,000 Amps Up to 2,700 Joules Up to € 175,000 Connected Equipment Warranties Data Recovery Warranty 	<ul style="list-style-type: none"> Up to 90,000 Amps Up to 3,240 Joules € Unlimited Connected Equipment Warranties Data Recovery Warranty

Warranty

Belkin designs and engineers its products to be free of defects in assembly, material or workmanship. See complete warranty inside for full details, limitations, and exclusions. Here are the ways we ensure your satisfaction:

Connected Equipment Warranty: Belkin will repair or replace any equipment damaged by a surge, spike or lightning strike while properly connected to a Belkin surge protector, up to the maximum value stated on the front of the package.

Lifetime Product Warranty: Belkin will replace, free of charge, any SurgeMaster that is defective or expires after protecting your electronic devices.

Warning: Use indoors and in dry locations. Not for use with aquariums or other water-related products.

Protects your valuable equipment from:
