Wired Speeds	Gigabit Ethernet	Ethernet
ADVANTAGE	Transfers large video, audio, and graphic files - 10 times faster than Ethernet	Transfers large files quickly
SPEED	1000Mbps	10/100Mbps

For Notebook Computers
A CardBus Notebook Network Card connects to a notebook computer to your Ethernet switch.

BENEFITS	Gigabit Ethernet	Ethernet
SPEED	Up to 1000Mbps	Up to 100Mbps

Gigabit Ethernet or Ethernet?

The 5-Port Network Switch provides the central connection point for your 10/100 network. Position your Switch within cable length of your notebook computer and connect your cable.

Here's what you need
Per collegare il proprio computer portatile ad una rete cablata o ad un modem a banda larga. Ligue o seu portátil a uma rede cablada ou a um modem de banda larga.
Una placa de red CardBus para notebook con acceso a Internet. Coloque el adaptador de red en la ranura para tarjeta de red del notebook. Inserte el CD de instalación en su unidad de CD-ROM. Inicie la instalación de software de instalación de la tarjeta de red.
Este es lo que hace
La tarjeta de red para notebook conecta su notebook a una red por cable o a una red por cableo ancho.
Come funziona
La scheda di Rete CardBus per Computer Notebook permette di collegare il proprio computer portatile ad una rete Ethernet 10/100 Base-T. Questo tipo di connessione permette al notebook un accesso a Internet ad alta velocità e permette di condividere file e periferiche con gli altri computer all'interno della rete cablada.
