# RazorVision™ Video Cable DVI Cable

Enhance your HDTV and standard-definition picture clarity

Traditional digital video cables are designed to maintain the original source content and deliver it to your display without loss or interference. Using the RazorVision digital enhancement technology incorporated into PureAV Silver Series™ Interconnects improves the video content regardless of the display type.

RazorVision Cables provide you with the following picture improvements:

- Increased contrast with more visible details
- Brighter whites and blacker blacks
- Restored details in glare and shadows
- No edge-outline artifacts
- More image depth

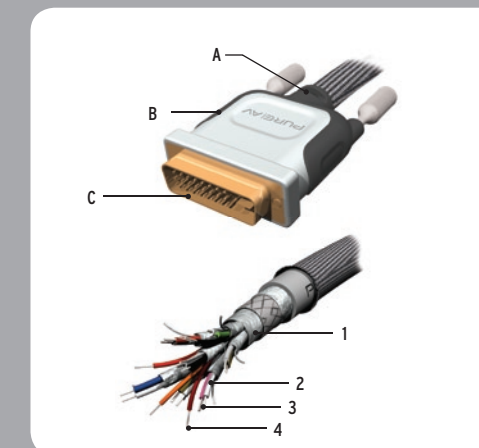

### How RazorVision Works

Using technology originally created for medical, industrial, and military applications, RazorVision incorporates the market's first system-on-chip, real-time, video-enhancement-integrated circuit into an active cable. Use RazorVision with new HDTVs or to upgrade the picture quality from your existing digital TV or video display. RazorVision works with all components using DVI or HDMI™ interfaces, such as DVD players, digital video recorders, PCs, and cable/satellite boxes. RazorVision control features include Status and Level selectors, which allow you to enhance your picture according to your viewing preference. In addition, RazorVision allows you to split the screen to compare your existing picture vs. the enhanced RazorVision picture.

## RazorVision™ Video Cable

### This Box Includes:

- RazorVision Control Box
- AC Power Adapter (120V)
- Two 4 Ft. PureAV Silver Series™ HDMI Interface-to-DVI Video Cables
- RazorVision User Manual

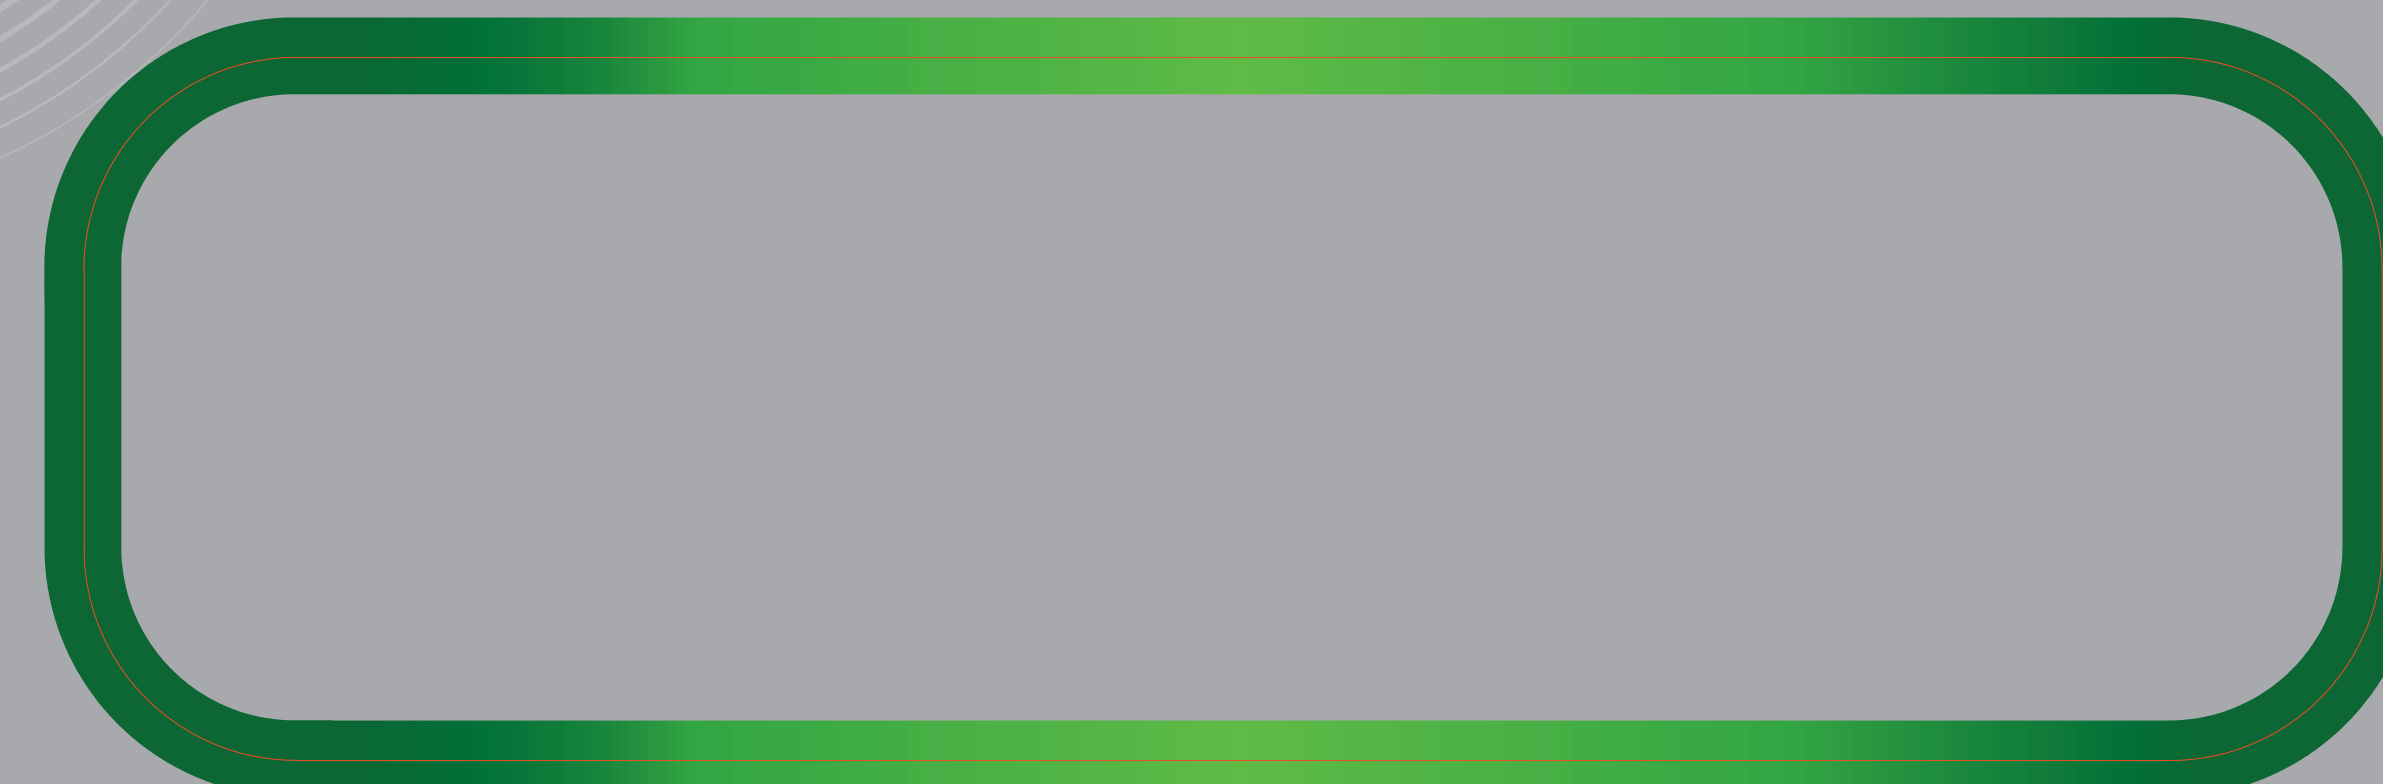

- Integrated Strain Relief**  
Protects against wire damage for consistently high-quality video
- Non-Slip Rubber Grip**  
Provides comfort and ease of install
- 24k Gold-Plated Connectors**  
Create precise contact for low loss
- Five-Layer Shielding**  
Isolates from outside noise for superior clarity
- Precision-Formulated, Polyethylene Dielectric Material**  
Maintains stronger signals that yield superior sonic and video accuracy
- Silver-Plated Conductors**  
Deliver best high-frequency response for optimal resolution
- 99.99% Oxygen-Free, Solid-Copper Conductors and High-Purity, Silver Solder Joints**  
Drastically reduce signal distortion for unrivalled audio and video clarity
