

## Knowing Your Belkin Powerline Turbo Ethernet Adapter

### 1. Ethernet Link LED (left)

On Connected to Ethernet  
Blinking Ethernet network activity

### 2. Powerline Link LED (right)

On Another HomePlug® unit detected  
Blinking Powerline network activity

## Placing the Belkin Powerline Turbo Ethernet Adapter

1. Connect the Adapter directly into the wall receptacle.

2. Do not connect the plug into a power strip or surge protector since these devices may contain circuit filters, which may degrade the powerline signal.
3. Connect the powerline Ethernet cable to any computing device, such as a PC or printer, with an available Ethernet port.
4. Refer to the User Manual for information on changing the security on your powerline network (optional).

Installation is complete.

## Support

Belkin provides free technical support via phone and the Web. However, we encourage you to attempt (or retry) Steps 1 and 2 before contacting Support.

If you're still having trouble, contact Belkin Support.
