

Instructions for OS X installation for the Nostromo SpeedPad:

**CLOSE ALL OPEN WINDOWS BEFORE BEGINNING INSTALLATION.**

First click on the Nostromo-Array-11.sit file and let it download to your computer. Once the file is fully downloaded, continue with the installation instructions below.

1. The download of the NOSTROMO-N50-X.SIT file creates a file on your desktop called "Nostromo-N50-X-rcl.dmg". Double-click on that file.
2. A removable disk drive icon will appear on your desktop called "Belkin-Nostromo-N50" Double-click on that drive.
3. The next window will present two choices: "Install Nostromo N50.pkg" and "Uninstall Nostromo N50". Double-click on "Install Nostromo N50.pkg" to begin installation.  
Note: If you should need to remove this software in the future, follow steps 1 through 3 above, but in step 3 instead of clicking on "Install Nostromo N50.pkg", click on "Uninstall Nostromo N50" and follow the onscreen steps.
4. After clicking on the "Install Nostromo N50" the OS X install window opens.  
Note: You may have to unlock your system by supplying the installer with your Administration password. If so, click on the lock down at the bottom and put in your password in the next screen.
5. Click "Continue" at the bottom right of the installer screen to continue through the install.
6. Your "License agreement" will appear. Click "agree" to continue with the install.
7. You will now be asked to select a Destination for your program file. Click on your main hard drive and then click on "Continue".
8. On the next screen, click "Install".
9. MAKE SURE ALL OPEN WINDOWS ARE CLOSED, then click "Continue Install".
10. When prompted, restart your computer by clicking "Restart".
11. Your N50 software is now installed. You may connect your controller to your computer if you have not done so already.

If the Nostromo n50 SpeedPad is not detected an Error mark will appear at the top right section of the screen saying "No Device found". If that happens, check your connection for the N50 to your computer. If the problem persists, call Belkin technical support.

In order to configure the software, you will need to go to the "Applications" Folder on your hard drive and double-click on "Nostromo Control". For instructions and a tutorial on how to create a profile, please review the help files on the Nostromo Control Program menu bar.
