

Introduction

Congratulations and thank you for purchasing the Laptop Power Supply from Belkin. The Laptop Power Supply features smart-digital technology, the complete, all-in-one solution to your charging and power needs, at home or while traveling.

The Laptop Power Supply eliminates the need for a separate charger for each laptop you own and acts as a universal replacement for all laptops. It charges any laptop computer from any standard AC power source.

Product Registration and Warranty

For terms and conditions, to activate your warranty, and to register your Laptop Power Supply, please visit www.belkin.com/powersupply.

Note: If the tip you require is not included in the packaging, you can obtain a free tip by providing the device information indicated. During registration, you must identify the laptop that you are registering (and for which you are seeking coverage). Refer to the website indicated above to ascertain which tip you need.

Package Includes:

- Laptop Power Supply
- Connection tips
- Carrying case
- AC Wall-Input cord

Before use, please read the following important safety information.

Following these simple guidelines will ensure trouble-free operation and optimal performance of the Laptop Power Supply and compatible electronic devices.

1. Avoid pulling on the cords and cables. Always grip plugs firmly when unplugging from power source and when disconnecting cables. Never force a connection tip into an electronic device.
2. Before use, completely review connection-tip compatibility information found in the instructions, or at www.belkin.com/powersupply.

WARNING: Using the wrong connection tip may damage your electronic device or cause it to malfunction.

3. To avoid electrical hazard, be sure to unplug adapter from external power source before attaching connection tips.
4. For indoor use only. Avoid exposure to external heat sources; direct, prolonged sunlight; dust; corrosive chemicals; and moisture.
5. It is normal for power supplies to become warm during use. Avoid touching the device during use. Avoid placing in direct sunlight or near heat-sensitive materials.
6. Do not drop or subject the Power Supply to undue shock.
7. Do not place anything on top of the Power Supply.
8. Always use the supplied cables and connectors as shown in the Setup Guide. Use of cables, connectors, or accessories not supplied with this product constitutes misuse and may result in injury or damage.
9. Do not attempt to service or disassemble. The unit is not user-serviceable. Attempting to disassemble or service the unit can result in electrical hazard, including death from exposure to high voltage. If you experience problems with the unit, discontinue use and contact Belkin for assistance. Attempting to open or service the unit voids all warranties, express or implied.

Using the Laptop Power Supply: Completely Review Product Setup Guide.

AC Wall Outlets: The Laptop Power Supply can be operated from any standard wall outlet using the included AC power cord. A blue LED will light when you plug it in, indicating the unit is powered on. Attach the appropriate connection tip to your device while the unit is unplugged to begin charging. It is normal for all power supplies to be warm during use. Avoid placing the Power Supply near heat sources, direct sunlight, or heat-sensitive materials.

Environmental Characteristics:

Operating Temperature Range: 0° C to 40° C
Storage Temperature Range: -40° C to 85° C

Specifications:

Worldwide AC Input:
100V to 240V AC

Output Power:
High Output: 16V to 24V/3.55A (Peak 4.6A)

Continuous Output Power:
Up to 75W

Unit Dimensions:
115mm (L) x 50mm (W) x 30mm (H)

Unit Weight:
500g

Certifications:

Complies with FCC Part 15, Subpart J, Class B

Safety Features:

- Surge protection
- Over-current protection
- Overvoltage protection
- Overheating protection

Patented Connection-Tip Technology

Belkin digital connection tips feature gold plating, which is corrosion-resistant and improves conductivity. A digital connection tip ensures Laptop Power Supply products deliver exactly the power your portable electronic devices require. Be sure to check the connection-tip compatibility guide to ensure problem-free operation.

Note: Failure to confirm connection-tip compatibility with your portable electronic device may damage your device or cause it to malfunction.

Please consult www.belkin.com/powersupply to determine the appropriate connection tip for your device.

Note: Belkin has made every attempt to identify and include correct connection tips. However, new portable electronics reach the marketplace every day—please consult our website for the most up-to-date compatibility information.

Troubleshooting Guide

In most instances, solving problems with your Laptop Power Supply is simple.

If your device is not charging or operating properly, do the following:

1. Disconnect the Laptop Power Supply from power source.
2. Verify that the correct connection tip has been installed by checking the connection-tip compatibility list. Connection tips may fit the power input on multiple devices. Never force a connection tip into an electronic device.
3. Reconnect the Power Supply according to the steps in the Setup Guide. Check to ensure that all connections are secure.
4. Plug the correct connection tip into your electronic device. The device should begin charging regardless of whether it is powered on or off.
5. If the blue power-indicator LED does not light, it may be burned out or the unit may not be connected correctly to the outlet. Disconnect all devices and reconnect the Power Supply. Check to ensure that all connections are secure.
6. If you are still experiencing problems, please contact Belkin.
